

# Spin a Pattern

## Directions:

1. Print off one spinner board (this page) for players to share and a game board for each player.
2. Re-sort the words from the word sort before playing.
3. Using a paper clip as a spinner, players take turns spinning on the spinner board below.
4. If a player lands on a pattern, he writes one of the words with the that pattern under it on his game board. For example, if the a\_e pattern was spun, that player would write *place* or another word with the a\_e pattern under the header a\_e on his game board.
5. The first player to write six words of any one pattern on his game board is the winner. (If you want to play multiple times, insert each players' game board into a plastic sleeve protector.)
