Use these pages with learners for extra sight word practice. Learners read the word, find the correct spellings of the word, use spelling manipulatives to build the word, trace the word, write the word, AND (this part excites me) use the word in the context of a sentence. Learners can write the sentence themselves, dictate it to you, copy it from a sentence you create together, write it with a pencil (sharpening the pencil) or any combination of these. You can differentiate this step for your learners.

These sight word pages are included with the triple handwriting lines or single lines (as seen in the example page below).

If a word is a homophone (like *see* and *sea*), a picture is also included at the top to demonstrate the word's meaning. This way, learners know how to use the word in the context of a sentence.
